

NATURALT[®] ALL NATURAL RED

NaturAlt[®] Red is extracted from natural sources (anthocyanins, carmine, betalains or lycopene) but with the necessary stability to maintain its intensity and chromaticity after the thermal processes used in the food and beverage industry.

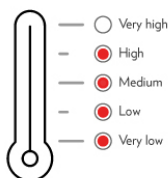

Our appetizing **RED** hues will provide your product with a desirable and irresistible appearance to consumers looking for a product designed to meet market trends, such as the use of Natural Ingredients, complying with the legal framework and providing a clean label by being free of artificial colors.
